(4) Hazardous Material Inventory
(5) Noise Level Survey
(6) OPNAV 5100/14 - Workplace Monitoring Plan

1. A comprehensive baseline survey was conducted of your facilities in accordance with references (a), (b), (c), and (d) by B. J. Howell, Industrial Hygienist of the Occupational and Preventive Medicine Department. This survey consisted of on-site investigation of processes, procedures, and facilities in each work area, along with interviews of shop supervisors and employees to allow a thorough industrial hygiene assessment of health risk. An environmental monitoring plan to collect data was developed to confirm the walk-thru assessments.

2. Enclosures (1) through (6) provide information concerning the survey.

3. The assistance and cooperation afforded us by your personnel was greatly appreciated. Any questions concerning this report should be directed to B. J. Howell, Industrial Hygienist at extension 1930/2767./6813

EXECUTIVE SUMMARY

The following is a summary of major findings applicable to Marine Air Group 26 squadrons:

1. Hearing Conservation Program elements as outlined in reference (d) should be continued. If new equipment is procured or modified, contact the Industrial Hygiene Department to survey equipment within thirty (30) days. Enclosure (5) reflects noise survey results.
2. Elements for a minimum acceptable respiratory protection program as required by reference (e) should be implemented. Assistance in developing this program can be requested from the Industrial Hygiene Department.
3. Material Safety Data Sheets for the chemicals listed on the Hazardous Material Inventory Sheet have been requested from manufacturer's. Copies of these data sheets can be obtained upon request. The implementation of the Hazardous Material Information System (HMIS) in accordance with references (f) and (g) is required.
4. Personal sampling of specific operations will be scheduled to determine personnel exposure and inclusion into medical monitoring program. This excludes personnel who are routinely medically monitoring by job description regardless of exposure.
